

PARADOR

Laminate flooring

We know all about the special importance of the flooring for a feeling of well-being in the room: the perfect combination of function and appearance is what characterises valuable home living.

In the choice of the laminate flooring, the requirements of life come up against personality and style. A wide variety of decors and valuable materials combine to make durable products that withstand the requirements of life.

Sustainably and considerably produced, impressive in terms of design and highly functional in its application, Parador laminate flooring is impressive and has been delighting us and our customers for over 40 years.

living

Living performance

is the core of the Parador brand. For us, living means appreciating beauty. Performance is precisely that. Parador combines both at the highest level – and prepares the ground for individual living spaces.

performance

Art of living meets performance

The world is changing. Increasingly complex challenges and multi-faceted impressions create surprising movements, ultimately fashioning a new dimension to the value of home living.

People who deal with forms of individual living and identify with their home in a new way turn into communities, who take care with their home surroundings.

The criteria by which the quality of life and living are re-evaluated are changing. Parador products make a sustainable contribution in this regard. In them, beauty, design and technology, worth and longevity are combined to form a perceptible and emotional basis that withstands the demands of everyday life.

In this respect, our aim is to earn the trust of our customers for everything that we do – with clear values and a clear attitude: we are genuine, innovative and ambitious. We are proud of combining valuable home living with artistic life through what we do.

Living performance.

1. Our attitude is a clear compass that points to the future.

2. Inspirations from art, architecture and society give our products character and personality.

3. The highest standards of quality “made in Germany” are the foundation and drive for our work.

4. An innovative spirit and excellent technology lead to results and awards recognised worldwide.

5. Our floors promote healthy living, are low on emissions and create a pleasant living environment.

6. Sustainability is our foundation and goes hand in hand with our responsibility to preserve nature for the next generations.

Innovation hub and material workshop, trendsetter and design leader: Parador is as *versatile* as the products for which the company stands.

On the following pages we show what makes our wide offer so special: a *declaration of love* to the possibilities of customised room interior design with Parador laminate flooring.

The influences on the design of flooring are becoming increasingly varied. Whilst some people appreciate trends from art, lifestyle and fashion, others are interested in classic design. With our decors we have something for everyone. Proficiently and at eye level with the relevant trends in terms of home living and design, the Parador design team creates high-quality, inspiring decors at the Coesfeld site from perfect templates provided by nature or as a graphic statement. The fact that Parador laminate flooring also stands up to intensive use almost goes without saying.

Valuable home living comes about at Parador through the combination of extraordinary design and technology. Parador laminate flooring always impresses with 100% reliable solidity due to the highest quality made in Germany, user comfort and healthy living. That is demonstrated by the straightforward installation using our patented click systems – and furthermore in the product structure too: whilst the backing guarantees dimensional stability, the particularly abrasion-resistant overlay protects against everyday stresses and strains. Inspired by the reliability and resistance of nature, floors thus emerge that withstand life with all its facets.

“Inspiring and reliable, durable and harmonious – we transfer these properties from nature to Parador laminate flooring, which withstands life with all its facets.”

Sustainability is what drives us.

During the production made in Germany we use wood from sustainably managed forests. The tested and certified material used to manufacture Parador laminate flooring comes from Europe. The results are sustainable products that promote healthy living, are free of PVC, plasticisers and phthalates and are recyclable – because the health of our customers is just as close to our hearts as the future of the earth.

Parador laminate flooring impresses

due to its technical strengths – and due to an outstanding price-performance ratio. It is also suitable for underfloor heating and cooling. More generally, our leading competence and the associated high performance capacity of the Parador products has been valued by customer across the whole world for decades.

a, b, e The variety of life repeatedly inspires us to come up with new designs. Our floors from the Edition product collection also assume a special role in this respect.

c Precision and intuition are decisive quality factors during the manufacture of laminate flooring.

d Resistance and vision: we are inspired by these values to repeatedly come up with new creations in product design and decors in laminate flooring.

Parador laminate flooring gives young living a lightness and warmth.

Long-lasting fascination and *numerous functions* turn Parador laminate flooring into a quality product made in Germany, where home dreams become reality.

Be it authentic interpretations of high-quality timbers or of classic materials like stone: our *wide variety of decors* picks up on contemporary trends just as much as the classics of the design world.

Parador laminate flooring is also highly regarded due to its durability and low maintenance properties. As a *system provider*, we have completely rethought the room planning process on the floor.

Basic

is our collection for all those who are price-conscious but do not want to forgo quality: in the Basic collection you will find an impressive selection of attractive laminate floors that turn any place into a genuine home.

Page 24

Classic

is uncompromising in quality, classic in design and can be used almost everywhere. The Classic collection is aimed at people with a high standard of design and quality.

Page 36

Trendtime

delights all those for whom the flooring is an expression of their attitude: the line combines a unique design spectrum for stylish furnishing in pace with the time with worth at the highest level.

Page 46

Hydron

is our answer to the challenge posed by water. With Hydron we have created products that are water-resistant – for all those who also want to enjoy laminate flooring in wet rooms like the kitchen or bathroom and who attach particular importance to durable, robust flooring.

Page 60

Edition

combines exclusive special collections – shaped by international trends and cultural influences. Created by Parador itself and working together with renowned designers, the floors stand for unique design quality alongside the highest functionality.

parador.de/en/design-collection

 **Iconics** Our passion lifts the work on the product from rationality to the level of sensuality. In the product world, uniqueness is increasingly important: products with soul. We take this conviction into account with our new "Iconics" products. They are modern signs with iconographic potential – bold, extraordinary and at the same time relevant to the design of beautiful spaces with a special character.

We live for products, that turn any place into a genuine home.

The wide variety: laminate flooring is ideal for use in different living areas.

Synchronous texture

Synchronous textures made by Parador have a particularly natural quality. The textures are precisely matched to the representation of the decor image and imitate, for

example, knots in the timber or fine cracks in a vibrant manner. Different depths determine the diversity and give the flooring a particularly authentic appearance.

Parador Iconics

“Cheerfulness and satisfaction in cosy interiors.”

Hygge Iconics is inspired by the Danish way of living: doing something good for yourself, finding cheerfulness and satisfaction in cosy interiors: all this is what characterises Hygge. Accordingly we have designed a laminate floor that

is based on a colourful stone texture and would like to make a small contribution to something very valuable: to a pinch of everyday happiness.

Crude steel looks modern, timeless and elegant – and makes the other elements in the interior space shine.

Floors are expected to last a long time and at the same time are exposed to countless stresses and strains, day after day.

A particular challenge in this context: developing floors that can even withstand the effects of water.

As a water-resistant floor, our special Hydron collection takes on this challenge: Hydron provides 24-hour protection in case of standing water – and is therefore ideally suited for wet rooms.

-  Micro-scratch resistant and durable
-  Enhanced antistatic
-  Suitability for damp areas

Parador laminate flooring is particularly durable due to its high-performance structure.

It impresses with materials that are healthy in the home and is very easy to maintain – ideal for use in very different living areas. And intelligent click systems enable our all-rounder made in Germany to be easily installed.

Parador laminate flooring

Functional and diverse

The overlay, a highly abrasion resistant, water impermeable top layer made of melamine resin stands up very well to everyday stresses and strains. The water-based colours and the FSC-certified decor paper impress with extraordinary brilliance and also reproduce near-natural material templates in an authentic manner.

The backing protects the highly compacted, low-swelling core board from moisture from below and guarantees high dimensional stability. In addition, the simple and secure click connections joined without tools ensure fitting accuracy and connection stability.

parador.de/en/your-floor/product-knowledge

-  Micro-scratch resistant and durable
-  Brilliant, authentic look
-  Edge swell protection
-  Safe-Lock® PRO click connection
-  Suitable for underfloor heating and cooling
-  Suitable for slightly uneven substrates

- 1 Overlay
- 2 Decor paper
- 3 HDF core board
- 4 Counter layer
- 5 Click connection Safe-Lock® PRO *

 **Hydron** – Water-resistant due to waterproof surface and reverse side, particularly low-swelling HDF core board, tight and close-fitting click system and hydrophobic special lacquer on the groove

* except Trendtime 3 which has an Allround-Click system

Real beauty delights all the senses. Together with the brilliant looks, *the surface texture* and the *joint pattern* create a harmonious overall experience.

While the joint design distinguishes the characteristic profile of the floor, the texture embossing accentuates the reproduced materiality of the decor significantly, such as wood, stone or concrete.

Joints

Without joint
Without a joint, the planks connect without any clearly recognisable spaces. The harmonious pattern of the floor creates a closed overall impression.

4V-groove
The 4-sided groove emphasises every single plank. In this way, the charm of real floorboards and tiles emerges.

Surface textures

Sometimes it is deeper and sometimes flatter, but always tangible and kind to all those who walk on it barefoot, in shoes or on four paws: the surface texture of Parador laminate flooring is characterised by quality and depth of detail.

In the case of **synchronous pore**, the embossing follows the decor grain precisely. The result is a look that can hardly be distinguished from real wood.

Underlays

Parador floors can be optimally installed for any application: our underlays even out small bumps and at the same time provide high compressive strength. With an integrated moisture barrier, the right product ensures the necessary moisture protection in case of mineral substrates.

parador.de/en/services/faq/underlays

Service with system: A perfect overall impression is down to the detail. That is why Parador provides the exactly matching accessories for installation and care – for the joy of flooring. From the start.

Tools

Parador floors can be easily installed with few additional tools:

parador.de/en/your-floor/product-knowledge/laminate-flooring

Skirting boards

Parador offers a wide range of optically matching skirtings for a harmonious look to any product. Alternatively, the colours stainless steel, white and black or a primed surface for customised painting, give the opportunity to deliberately accentuate. Parador skirtings impress due to their easy fitting with clip technology (optional adhesive in adhesive groove). Our choice of caps rounds the range off. Simply perfect!
parador.de/en/skirtings-accessories

Profiles

Parador profiles combine, bridge and create finishes for perfect flooring aesthetics. As transition profiles, they connect floor coverings of the same height and expansion joints. Adapting profiles are used for the transition between different high floor coverings. End profiles create clean borders with tiles, door sills and French

windows. Perfect flooring harmony is achieved with the 3-in-1 profile that is identical to the flooring in terms of decor and texture, which can be universally used for every purpose.
parador.de/en/your-floor/product-knowledge/skirtings-and-profiles

Cleaning and maintenance

When it comes to cleaning and maintenance, our accessories continue the high quality line of the Parador floors down to the last detail: Parador care accessories ensure a particularly long life cycle.
parador.de/en/your-floor/product-knowledge

Repair

With the Parador premium repair set, minor damage is soon rectified – because taking joy in our products for a long time is close to our hearts, even if some slight damage to the flooring is incurred from time to time.
parador.de/en/your-floor/product-knowledge

Setting standards. Taking responsibility.

We act sustainably, take responsibility for the future and are committed to bringing the environment, social issues and responsible business practices in *perfect balance*.

When it comes to manufacturing products that are healthy in the home, we use tested raw materials. During the manufacture of all Parador products, besides wood we use other high quality, recyclable and environmentally-friendly materials from monitored sources; engineered wood flooring is, of course, produced by us using timber from sustainably managed forests.

We are continuously certified by independent institutions. Production, materials and products from Parador go beyond statutory requirements when it comes to meeting the value standards of a brand with responsibility. We are the first and only flooring manufacturer in Germany to be EMAS-certified since 2015: EMAS is the most demanding system worldwide for environmental management.

We are committed to our particular responsibility for the environment. Wood is sustainable and actively contributes to climate protection. Once installed, all Parador products are characterised by a long life cycle. Where we can, we use materials that can be easily reused in terms of energy and material.

Plant-for-the-Planet. Since 2011 Parador has been a partner of the "Plant-for-the-Planet" foundation, which campaigns worldwide for reforestation and climate justice. We support the initiative with tree-planting campaigns, as a result of which almost 200.000 trees have been planted by Parador alone.

Der Blaue Engel (The Blue Angel)
"Der Blaue Engel" certifies that Parador products are low on emissions based on the current award principles.

TÜV Rheinland
The TÜV test mark confirms independent monitoring of the quality, production and functionality of the products.

PEFC™
This trademark is awarded to products that meet the requirements of the certification system for the documentation and improvement of sustainable forest management with regard to economic, ecological and social standards.

eco-INSTITUT
Products with this seal meet the most stringent pollutant and emission requirements prescribed by the eco-INSTITUT.

Émissions dans l'air intérieur (Class A+)
This national classification valid in France indicates the quality of indoor air.

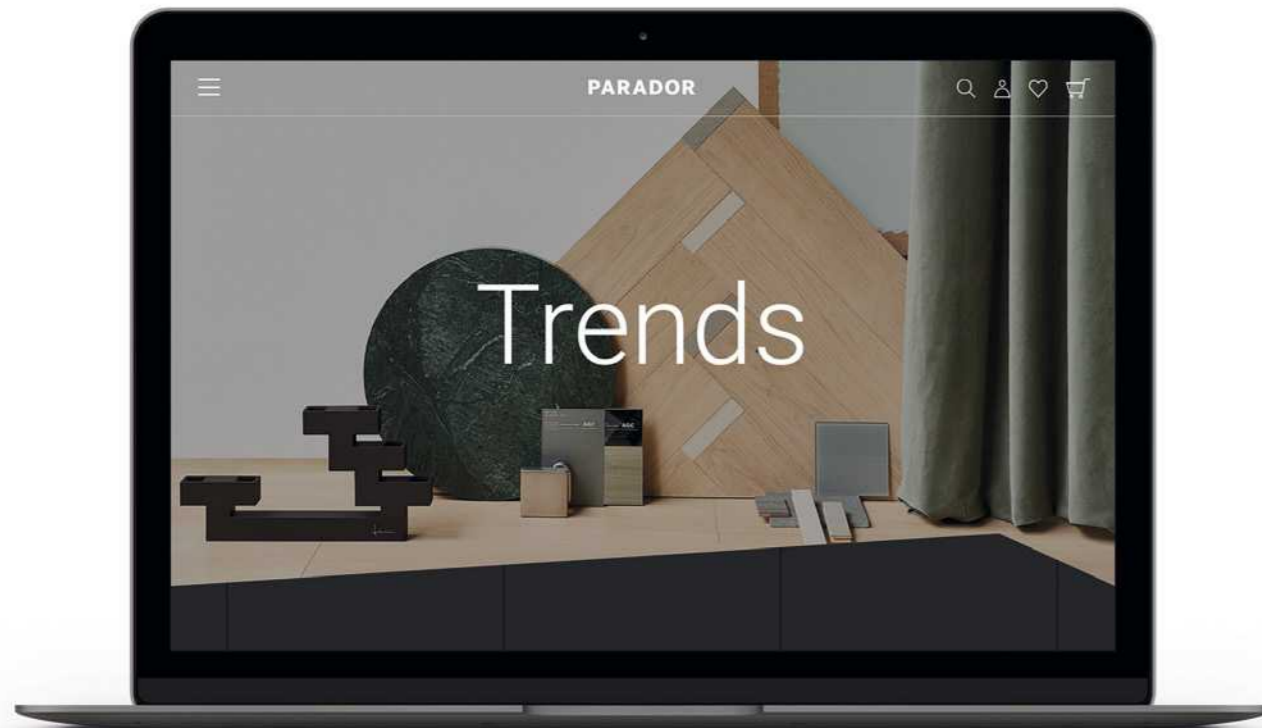

FloorScore®
FloorScore® is one of the best-known American certification programs that certifies floor coverings and related products for compliance with indoor air emissions.

EPD
An EPD (Environmental Product Declaration) is based on ISO 14025, the core element of which is the ecological assessment, in which the entire life cycle of a product is disclosed.

You can find out more information about us, our quality and design standards and about our products on parador.de/en. If you have any questions, we will be happy to help you. We thank you for your visit!

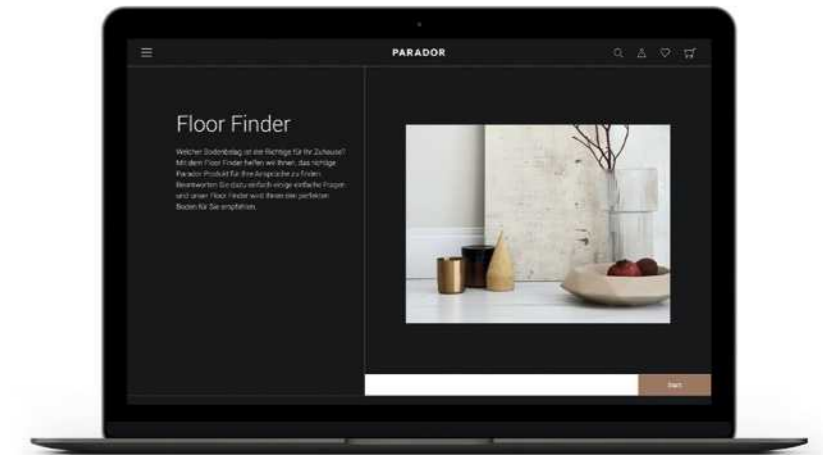

Inspiration

Be inspired by international design trends and the elegance of timeless furnishing styles: you will find everything about our comprehensive range, the company and new products and innovations from the Parador stable at parador.de/en

Room designer
